ELISA Kits for Cytokines Research

Sensitive | Accurate | Reliable

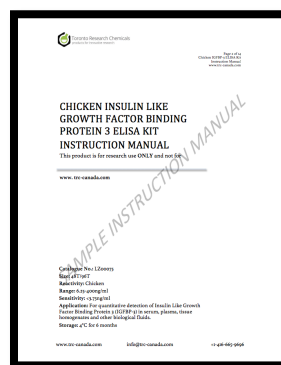

Cytokines are peptides that have a fundamental role in communication within the immune system and in allowing the immune system and host tissue cells to exchange information. Cytokines exist in broad families that are structurally related but exhibit diverse function (e.g., the TNF/TNF receptor superfamily, interleukin [IL]-1 superfamily, and IL-6 superfamily). **TRC offers a wide selection of cytokine ELISA kits for innate and adaptive immune research.**
